80%
OF SMBs
ARE EASY TARGETS FOR HACKING & DATA LOSS

SAFEGUARD YOUR BUSINESS IN

JUST ONE TAP!

audra
BUSINESS

Various reports show that SMEs are the **easiest target** for cyber attackers globally.

80%

of SMEs are targeted by cyber criminals

45

the number of reported cyber attacks are rising

6

of SMEs that are attacked close witihin 6 months

Although most SME **owners are aware** of the dangers, getting a firewall solution to guard your network is seldom an easy task.

Lack of technical expertise available

Complex to set up and maintain

High total cost of ownership

Why is Audra practical for you?

Audra Business is built for SMBs knowing their pain points when it comes to firewalls.

After successful trials over thousands of SMBs, Audra is perfected with the right features, right controls, and right remote management.

Packaged in a simple mobile app, Audra Business is the best fit firewall for SMBs with almost no IT capabilities.

Cloud AI

Machine learning driven AI cloud solution keeps all your network security intact. Constantly updated by a team of security professionals

On-premise Device

Robust gateway device, OTA updated firmware and zero-touch easy setup

Management App

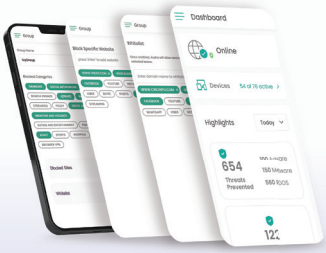
Easy network security and policy setting on-the-go: anytime, anywhere

- **Robust cloud firewall**
- **Single device, easily scalable**
- **Simple mobile app / web panel**

JUST ONE TAP!

audra BUSINESS

Firewalls made simple for SMEs



Audra Business is designed specifically for SME owners that are looking for easy to manage, yet robust firewall solution that works out of the box with minimal setup.

Get hassle-free protection against most common cyber threats, and manage everything easily from the intuitive mobile app.

Robust network security

- Set IT policies to prevent threats
- Block incoming malicious attacks
