

AUDRA BUSINESS

PRACTICAL FIREWALL FOR SMBs

Ai-powered | Practical | Affordable

audra
Your internet. Your rules

ABOUT AUDRA BUSINESS

Audra Business is an enterprise-grade firewall with home-grade simple user experience. Audra secures your business from online threats like malware, hacking, DDoS etc. You get seamless connectivity through complete bandwidth management. It also helps your team to focus on work by ensuring controlled access.

THERE ARE 3 COMPONENTS IN AUDRA BUSINESS:

(1) GATEWAY DEVICE : This sits between your modem and access points to connect all the office devices like laptop, smartphone, CCTV, printer etc.

(2) CONTROL APP : You can set rules individually and group-wise with the intuitive mobile app and monitor in real-time.

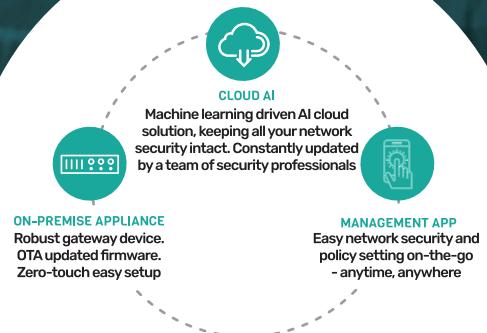

(3) CLOUD AI : The robust Audra Cloud AI syncs all the rules you've set through your control app. It checks all the traffic whether they're allowed to access internet or not. It also detects the latest online threats and prevents them before they could enter into your network.

This way, Audra Business continuously works in the background to secure your office internet.

AUDRA BUSINESS

PRACTICAL FIREWALL FOR SMBs

SIMPLE MANAGEMENT APP

Have complete network security and work productivity with the intuitive mobile app

FUTURE-PROOF HARDWARE

Connect up to 100 devices concurrently with the robust 1GBPS device
